

**CALL FOR PAPERS**  
**Thematic Session on the Analytic Hierarchy Process**  
**Production**

Dear members of AHP/ANP community,

We are pleased to inform you that for 2021, journal Production ([www.prod.org.br](http://www.prod.org.br)) will publish a Thematic Session on the Analytic Hierarchy Process (AHP). Extended papers from works presented at the International Symposium on the AHP (ISAHP) are very welcome for this call. This includes all ISAHP's tracks. More than simply solve a company's problem with AHP/ANP, submitted papers need to clearly present a methodological contribution.

Since its foundation, in 1990, Production has been the flagship journal of Brazilian Association of Production Engineering (ABEPRO). In 2013, the journal changed its name from Produção to Production, for a worldwide audience. Submissions and open-access to papers have been kept free of charge, mainly due to ABEPRO's support. Indexation in EBSCO, SCIELO and SCOPUS turns Production attractive for authors, while inclusion in PUBLONS attracts journal to reviewers.

Authors need to follow journal's guidelines ([production.periodikos.com.br/instructions](http://production.periodikos.com.br/instructions)) and submit their paper on [mc04.manuscriptcentral.com/prod-scielo](http://mc04.manuscriptcentral.com/prod-scielo). To expedite the process, submission will be promptly screened by Editor-in-chief and staff. Next, guest-editor will lead the process, with AHP's senior reviewers. Our plan is beginning to publish online papers in the first half of 2021. Guest-editor will be in touch and focused on this purpose.

We are looking forward to your submissions and see you online in ISAHP!
